New iClave mini

Introductory
special price
£2475

A Handpiece Autoclave small enough to use anywhere

A handpiece autoclave from a handpiece manufacturer, complying with Europe's Class S sterilisation standard. The iClave mini sterilises even the invisible parts of handpieces and is completely portable to use anywhere.

Small enough to fit any space

The iClave mini weighs only 15.5kg. Just plug it in and start sterilising. Its compact and elegant design makes it an ideal fit for any clinic interior.

Unit size: W210 x D320 x H360mm, chamber 2.5L

Effective sterilisation of hollow instruments

The iClave mini complies with Europe's class S sterilisation standard. It repeatedly de-aerates to sterilise even the inside of a hand piece.

Fast and compact but with large capacity

The new direct-heating technology around the 2.5litre chamber aims to work and perform like the combination of copper chamber and adaptive heat system. iClave mini is compact in size yet large in capacity while at the same time running fast and efficient cycles.

User-friendly, easy to read operating panel

With a sophisticated design and excellent visibility, the iClave mini panel is easy to operate and maintain, enchanting sterilisation reliability.

A user-friendly design

The iClave mini is designed with ease of use and day-to-day maintenance in mind. The smooth, seamless design inside and out as well as with the design of the control panel make it extremely user friendly in every respect.
